

Brandon Leone

Shrewsbury, MA | (978) 905-1840 | brandonjleone@gmail.com | [GitHub ↗](#) | [Personal Portfolio ↗](#)

EDUCATION

Assumption University, Worcester MA
Bachelor of Arts, Marketing

January 2026

SKILLS:

Languages: JavaScript (ES6+), TypeScript, HTML, CSS, SQL

Frontend: React, Tailwind CSS, React Router, Recharts, DnD Kit, Framer Motion

Backend: Node.js, Express, REST APIs, PostgreSQL, JWT Authentication, bcrypt

Database: PostgreSQL, Relational Database Design, SQL (JOINS, GROUP BY, Aggregations), MongoDB

Concepts: Full-Stack Development, Data Modeling, Backend Aggregation, Performance Optimization

Tools: Git, GitHub, Vercel, PgAdmin, Postman

Marketing/Analytics: Data Visualization, Analytics Dashboards, Excel, Qualtrics, IBM SPSS, PowerPoint, Canva

PROJECTS:

Personal Finance Analytics Platform – (React, Node.js, Express, PostgreSQL, Tailwind, Recharts)

- Built a full-stack financial analytics platform supporting user-specific transactions, budgeting, and spending insights
- Designed a relational PostgreSQL schema for users, transactions, and budgets using secure foreign-key relationships and normalized data modeling
- Developed SQL aggregation queries using JOIN, GROUP BY, and date-based filtering to compute spending trends, category analytics and budget utilization
- Implemented RESTful API with JWT-based authentication and protected routes for secure user-specific data access using Node.js and Express
- Created interactive financial visualizations using Recharts for weekly trends, income vs expense breakdowns, and category analytics
- Built a dynamic budget tracking system displaying real-time percentage usage and over/under budget classification
- Deployed on [Vercel ↗](#) | [GitHub Repository ↗](#)

Task Tracker (Kanban Board) – (React, Node.js, Express, MongoDB, DnD Kit, Tailwind)

- Built a full-stack Kanban-style task management application with drag-and-drop interactions
- Implemented persistent task ordering and cross-column movement with custom ordering logic
- Developed optimistic UI updates with rollback handling to maintain responsive user interactions
- Used MongoDB bulkWrite operations to efficiently update multiple task records after drag operations
- Implemented JWT-based authentication and protected application routes
- Deployed on [Vercel ↗](#) | [GitHub Repository ↗](#)

Project Manager App – (React, Firebase, Tailwind)

- Built a project management application with task tracking, progress metrics, and project-scoped chat
- Implemented real-time data synchronization using Firestore onSnapshot listeners
- Designed scalable Firestore data models for projects, tasks, and messages with user-level data isolation
- Developed dynamic progress tracking using derived state instead of stored values and structured reusable components
- Deployed on [Vercel ↗](#) | [GitHub Repository ↗](#)

WORK EXPERIENCE

Lowe's Home Improvement, Westborough MA
Cashier

May 2023 - August 2023

- Provided customer service and processed transactions using POS systems in a fast-paced retail environment

United Parcel Service, Shrewsbury MA
Package Handler

May 2022 - August 2022

- Organized and processed high-volume shipments, ensuring accuracy and efficiency in logistics operations
